Subject: Progress Report

RECEIVED
DEC 12 2002
South Central District

I sincerely appreciate your indulgence of time due to my illness.

Per your request, the following has been done:

- 1) Harper County commission has given permission to use the closed land fill to dump our "mud pit" soil. We have yet to collect enough to use this designated site.
- 2) Above ground storage tank regulation application has been sent. A copy is enclosed
- 3) Clean-up of oil bucket and oily areas is complete. Picture# 1 and #2.
- 4) Oil collection tank owned by Safety Clean has been pumped out.. It will be picked up the week of 12/17/02 per their supervisor. Picture #6
- 5) Placing of "used oil" signage is complete on all containers. Picture # 3 and #4.
- 6) Posted " Emergency Contact Information Bulletin on phone in the shop and in the managers office. Picture #5
- 7) SPCC Plan:
 1. Erect a 7' steel wall locked fence around the outside storage tank to prevent access without permission and vandalism.
 2. Annually drain off excess water out of the double walled tank to prevent rust and deterioration.
 3. Annually have all lines inspected for deterioration and wear.
 4. Train Service employees on emergency handling of spills.

Please let me know if any other reports to you are necessary

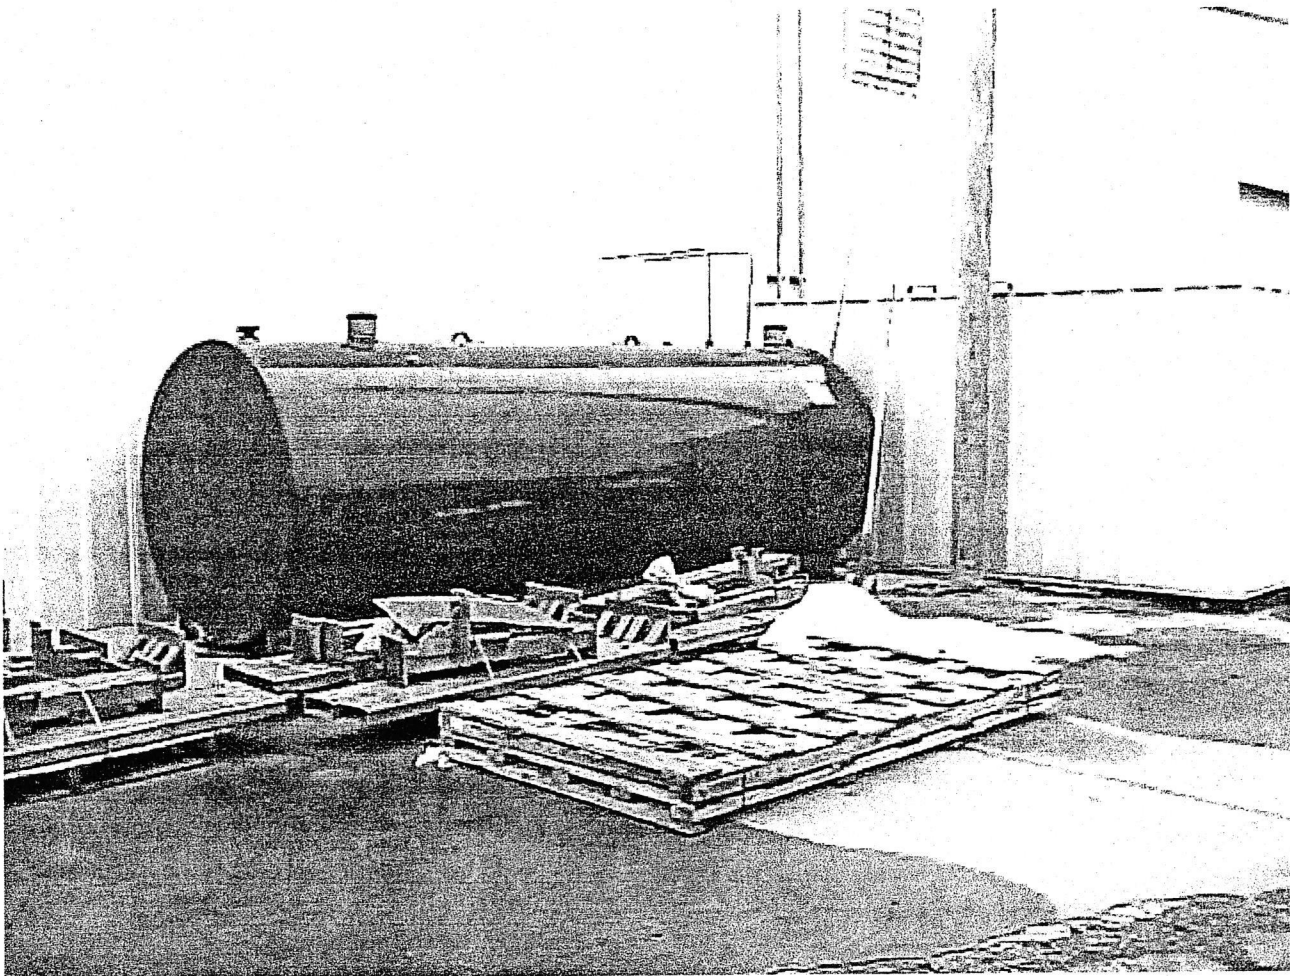

Regards

Tom Conrady
